COMMENCEMENT MESSAGE

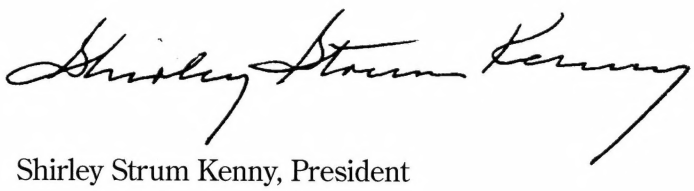
Congratulations to all our graduates! You have had the responsibility of shaping your education and choosing your life's work. You have discovered a lot about facts and figures and people. You have had your share of triumphs, and I suspect you have learned something about fortitude. I hope you have experienced joy.

Now your days at Stony Brook are over. You are setting forth on your next life's adventure. We wish you only the best.

I am optimistic that undergraduates have learned, along with calculus and Shakespeare and periodic tables, to connect with others, to cooperate, to work together for shared goals. Graduate students have learned that your profession, whatever you have chosen, will serve you well only if you serve others well.

Commencement is a very special time not only for you but for Stony Brook. It is the time when we know the importance of what we do because we realize the impact that you—our graduates—will have on the future.

May your next journey be full of happiness. May you thrive, prosper, and grow.



Shirley Strum Kenny, President

JOHN BELLE
DOCTOR OF FINE ARTS

Degree Conferred at Main Commencement Ceremony

A founding partner of Beyer Blinder Belle Architects & Planners in 1968, John Belle has made many extraordinary contributions to the field of architecture.

Born in Wales and educated in Britain, Mr. Belle graduated from London's Architectural Association School in 1955. Four years later, he moved to the United States, where he gained experience working with two great émigré architects, Jose Luis Sert and Victor Green. Mr. Belle has directed numerous urban design, restoration, and historic preservation projects for both private and governmental use. Projects under his direction have included the Preservation Plan and restoration of the Ellis Island National Monument, the restoration of New York City's Grand Central Terminal, the design and implementation of building and landscape issues of the Indiana University system, and the redesign of Stony Brook's Academic Mall and Humanities Building.

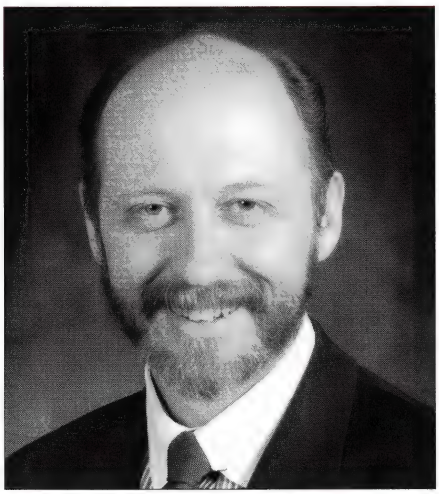
Mr. Belle has worked with preservation groups throughout the United States, and has been lauded for his tremendous dedication to the restoration of historical sites, using design concepts that preserve the dignity and elegance of the original sites. He has served as President of the New York City Landmarks Conservancy, the largest organization devoted to preserving historic buildings.

Mr. Belle has contributed his expertise and intuition to several other academic and professional positions; in past years, he has served as Chairman of the Pratt Institute's Graduate Department of Urban Design and its School of Architecture, as President of the New York Chapter of the American Institute of Architects (AIA), and as Chairman of the National AIA Committee of Urban Planning and Design.

Mr. Belle's many awards and honors include two Bard Awards from the City Club of New York for his role in the preservation of the South Street Seaport Museum Block and the restoration of Central Park, a U.S. Department of Housing & Urban Development Certificate of National Recognition, two Preservation Honor Awards from the National Trust for Historic Preservation, and two Royal Institute of British Architects Distinguished Architecture Awards. In addition, Mr. Belle served as Partner-in-Charge of the reconstruction and restoration of the Delaware Aqueduct, a project that received the Presidential Design Award, the nation's highest design award for public architecture.

Stony Brook is delighted to honor John Belle with the honorary degree, Doctor of Fine Arts.

HONORARY DEGREE RECIPIENT



JAMES A. HAYWARD
DOCTOR OF SCIENCE

Degree Conferred at Doctoral Ceremony

Respected scientist, entrepreneur, philanthropist, and Stony Brook alumnus, Dr. James A. Hayward is Chairman, President, and CEO of the Collaborative Group, Ltd., and founder of its key subsidiary, Collaborative Laboratories, Inc. In only ten years, Dr. Hayward has built Collaborative Laboratories into a world leader in the biotechnology industry.

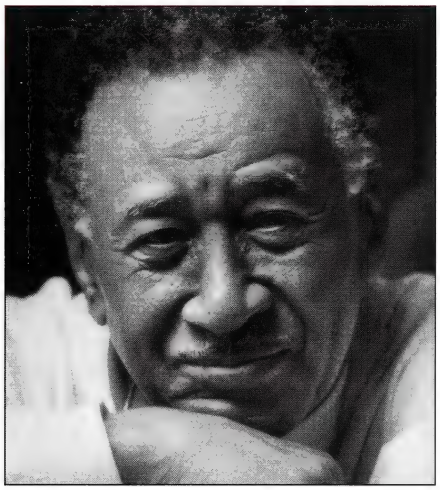
After receiving his bachelor's degree in chemistry and biology, Dr. Hayward went on to earn his doctorate in Molecular Biology and Biophysics at Stony Brook. For the next two years, Dr. Hayward served as Postdoctoral Research Associate, then Visiting Professor and Honorary Research Fellow at the University of London's Royal Free Hospital School of Medicine.

In 1983, Dr. Hayward became one of the founding principals and Research Director of Europe's first liposome company, Biocompatibles, Ltd. In the years that followed, he was responsible for product development at Esteé Lauder Companies, where he served as Director of Research Worldwide. In 1990, using his business and research background, as well as his experience in the consumer-product, biotechnology, and pharmaceutical industries, Dr. Hayward founded Collaborative Laboratories, Inc. (CLI).

Dr. Hayward has more than 50 patents and original publications regarding the applications of liposomes. He is also the recipient of numerous awards and honors, including the National Institute for World Trade's Global Vision 2000 Award, the New York Biotechnology Association's Helix Award, and the Ernst & Young, Inc. Magazine Entrepreneur of the Year Award. Dr. Hayward also serves on the boards of the Council on Biotechnology, the Long Island Association, the Stony Brook Foundation, the Research Foundation of the State of New York, and the New York Biotechnology Association.

Dr. Hayward's career exemplifies the best of academic life joined with the best in entrepreneurship and corporate citizenship, and Stony Brook is proud to honor him.

HONORARY DEGREE RECIPIENT



ALBERT MURRAY
DOCTOR OF LETTERS

Degree Conferred at Main Commencement Ceremony

Cultural critic, biographer, blues historian, essayist, and novelist, Albert Murray has been hailed by the National Book Critic's Circle as a "national living treasure."

After attending the Tuskegee Institute, Mr. Murray spent a career in the Air Force. Between periods of active military service, he taught literature at Tuskegee and completed a master's degree at New York University. Retiring from the Air Force as a major in 1962, Mr. Murray began writing in earnest. The first of his nine books, *The Omni-Americans,* published in 1970, explores the nuances of race and identity.

Over the next five years, Mr. Murray produced four more books attesting to his remarkable literary presence: his book of memoirs *South to a Very Old Place;* the novel *Train Whistle Guitar,* which was awarded the Lillian Smith Award for Southern Fiction; a book of criticism titled *The Hero and the Blues;* as well as the musical study *Stomping the Blues,* winner of the American Society of Composers, Authors, and Publishers Award.

In these texts and his four subsequent books, Mr. Murray has consistently proven himself to be a keen interpreter of European and American culture, actively engaged with Western history, literature, and music. A member of the prestigious American Academy of Arts and Letters, Mr. Murray has made crucial contributions to cross-cultural understanding by emphasizing the relationship between literary language and music.

Continuing his wide-ranging influence on American art in the decades since World War II, Mr. Murray currently serves as Mentor for the Jazz Program at Lincoln Center. Mr. Murray's literary and creative contributions have made him the mentor of a generation of writers, theorists, and critics.

Stony Brook is proud to honor Albert Murray, one of our country's most outstanding literary figures.

GEORGE WILLIAMS
DOCTOR OF SCIENCE

Degree Conferred at Main Commencement Ceremony

Recent Crafoord Prize recipient Dr. George Williams has made unique, internationally recognized contributions to the field of evolution.

After a tour of duty in the U.S. Army, Dr. Williams attended the University of California, where he received his bachelor's degree. In 1955, he earned a doctorate in Zoology from UCLA, and was immediately hired by Michigan State University, where he taught for 5 years. In 1960, Dr. Williams came to Stony Brook's Department of Ecology and Evolution, where he served for the next 30 years.

Dr. Williams' contributions to his field have been astonishing; among his accomplishments are enriching the clarity of understanding of such topics as evolution by natural selection, the nature of ethics in humans, and the ubiquitous nature of sexual reproduction in the biological world. Retirement has not affected Dr. Williams' position as one of the most influential evolutionary biologists in the world. One of his major publications, 1994's *Why We Get Sick,* founded the new field of "Darwinian Medicine" and initiated a revolution in how physicians will understand and treat disease.

In addition to producing more than 50 principal publications, Dr. Williams has served as a member of such organizations as the American Association for the Advancement of Science, the American Institute of Biological Sciences, the Icelandic Natural History Society, and the American Society of Naturalists. Dr. Williams has also served as both President and Vice President of the Society for the Study of Evolution, and was named as Honorary Life Member of the Ecological Society of America.

Dr. Williams' numerous other honors include election to the National Academy of Sciences, selection as Eminent Ecologist by the Ecological Society of America, an honorary Doctor of Science from Queen's University in Ontario, and receipt of the Royal Swedish Academy of Science's 1999 Crafoord Prize. The Crafoord Prize is generally held to be the equivalent of the Nobel Prize in fields not covered by the Nobel Committee, and is awarded only once in four years.

We are proud to honor Dr. Williams with the honorary degree of Doctor of Science.

JAMES WATSON

Presented at Main Commencement Ceremony

Cold Spring Harbor Laboratory President James Watson has been one of the most influential researchers in the history of genetics.

A native of Chicago, Dr. Watson entered the University of Chicago at the age of 15 and earned his B.A. in 1947. Just three years later, he received his Ph.D. in Genetics from Indiana University. In 1951, he joined Cambridge University's Cavendish Laboratories, where he met fellow researcher Francis Crick and began collaboration to determine the structure of deoxyribonucleic acid (DNA).

In 1953, Drs. Watson and Crick proposed that the structure of DNA was a winding helix in which pairs of bases held the two strands together. The Watson-Crick model of the DNA double helix provided the impetus for research in the emerging fields of molecular genetics and biochemistry, and along with Maurice Wilkins, Drs. Watson and Crick were awarded the Nobel Prize for Physiology and Medicine in 1962.

In subsequent years, Dr. Watson taught at Harvard and the California Institute of Technology. In 1968, he became Director of Cold Spring Harbor Laboratory, where he has been a brilliant fundraiser and advocate for basic research in science. Since 1968, Cold Spring Harbor Laboratory has become one of the world's leading research centers for molecular biology. Dr. Watson has personally continued to make invaluable contributions to his field, particularly in the understanding of the genetic code.

In 1988, Dr. Watson's scientific achievement and his success as an administrator led to his appointment as the head of the Human Genome Project at the National Institutes of Heath—a massive project aimed at deciphering the entire genetic code of the human species. Since 1994, Dr. Watson has also served as President of Cold Spring Harbor Laboratory.

Had Dr. Watson not discovered the structure of DNA, the building block of all life on Earth, modern biology and the biotechnology industry it has spawned would be unthinkable. Today, Dr. Watson's work continues to lead the way in genetic research.

Stony Brook is proud to honor Dr. James Watson with the University Medal.

UNIVERSITY MEDAL RECIPIENT

DR. ANTONIA COELLO NOVELLO

Presented at Medical School Convocation

Former United States Surgeon General Dr. Antonia Novello currently serves as the Health Commissioner for New York State.

Dr. Novello was born in Puerto Rico, where she spent much of her time in hospitals due to a chronic illness. Eventually, corrective surgery led to her recovery, but the experience determined Dr. Novello to pursue a career in medicine, by which she could help other ailing children.

Dr. Novello earned both her bachelor's and medical degree at the University of Puerto Rico. She moved to the United States in 1970 to continue her medical training at the University of Michigan Medical Center, where she received the Intern of the Year Award for her work in the Center's Pediatric Department. Dr. Novello joined the U.S. Public Health Service in 1978, serving in various capacities with the National Institutes of Health. In 1986, four years after earning a master's degree in public health from Johns Hopkins University, Dr. Novello became Deputy Director of the National Institute of Child Health and Human Development. In this position, she took a special interest in children with AIDS, and became the Institute's Coordinator for AIDS Research.

In May 1990, Dr. Novello became the U.S. Surgeon General. As Surgeon General, Dr. Novello advised the public on health matters, such as smoking, AIDS, diet and nutrition, environmental health hazards, and the importance of immunization and disease prevention. She also directed the activities of the 6,100 members of the U.S. Public Health Service Commissioned Corps.

After the close of her term of office as Surgeon General, Dr. Novello served as Special Representative for Health and Nutrition for UNICEF, and as Visiting Professor for Johns Hopkins University School of Hygiene and Public Health before accepting the appointment of New York State Health Commissioner in 1999. Dr. Novello has earned a multitude of honors and awards for her dedicated work, including the U.S. Public Health Service Distinguished Service Medal, the U.S. Army Legion of Merit, The American Medical Association's Nathan B. Davis Award, and the Surgeon General's Exemplary Service Medallion and Medal.

Stony Brook is proud to honor Dr. Antonia Coello Novello with the University Medal.

UNIVERSITY AWARDS

WARD MELVILLE VALEDICTORIAN AWARD

In honor of the first chairperson of the Council of the University at Stony Brook, the University's most distinguished undergraduate honor, the Ward Melville Valedictorian Award, is given to the graduating senior who has attained the most outstanding academic record during four years at Stony Brook.

H. LEE DENNISON VALEDICTORIAN AWARD

The H. Lee Dennison Award, named in honor of Suffolk County's first chief executive, is presented to the graduating senior who entered Stony Brook as a transfer student, completed at least 60 credits of letter-grade work at Stony Brook, and attained the most outstanding academic record at Stony Brook in that work.

PRESIDENT'S AWARD TO DISTINGUISHED DOCTORAL STUDENTS

This Stony Brook Foundation award is made possible by Dr. Donald Squires and Dr. Marian Steinberg. Criteria for selection include the quality of the dissertation and its research base, the student's outstanding contributions in ability or service to the University, or the student's overcoming of personal or social handicaps. This year's recipients are:

Jennifer Hansen (Philosophy), *Remembering the Self: Gender, Melancholia, and Philosophical Method*

Theo Cateforis (Music), *Are We Not New Wave?: Nostalgia, Technology, and Exoticism in Popular Music at the Turn of the 1980s*

James Genova (History), *'Les Chefs Naturels:' The Politics of Cultural Authenticity in the Making of Post-Colonial France and West Africa, 1914-1956*

Lisa Rodrigues (Psychology), *Narrative Assessment of Adult Attachment Representations*

David Solecki (Molecular and Cellular Pathology), *Analysis of the Promoter Region of the Human Poliovirus Receptor/CD155 Gene*

Henry White (Materials Science and Engineering), *Polymer Nanocomposites*

ACADEMIC ATTIRE

The costume of those in the academic procession has a specific symbolism that dates back to at least the fourteenth century. Academic institutions in the United States adopted a code of academic dress in 1895 that has been revised from time to time. The dress of institutions in other countries varies, and there is not a worldwide code, but the basic elements are present in all academic costumes.

GOWNS — The bachelor's gown has long, pointed sleeves; the master's gown has an oblong sleeve open at the wrist (some older gowns may be open near the upper part of the arm); the doctoral gown is fuller than the others with full-length velvet panels on the front and three velvet crossbars on each sleeve in black or in the color distinctive to the discipline of the wearer's degree. The gowns are black except for a few doctoral gowns, the color of which represents the degree-conferring institution.

HOODS — The hood, draped over the shoulders and down the back, indicates the wearer's alma mater and the discipline in which the degree was conferred. The level of the degree is indicated by the size of the hood. The bachelor's hood is three feet long, the master's is three and one-half feet long, and the doctoral hood is four feet long. The binding of the hood is velvet. The binding is two inches, three inches, and five inches wide for the bachelor's, master's, and doctoral degrees respectively. The lining of the hood is colored according to the institution conferring the degree. The lining of the doctoral hood is revealed more than that of the master's hood. Much less of the lining is revealed in the bachelor's hood.

The colors associated with the degrees are as follows:

Bachelor of Arts • White
Bachelor of Sciences • Golden Yellow
Bachelor of Engineering • Orange
Master of Arts • White
Master of Arts in Liberal Studies • White
Master of Arts in Teaching • Light Blue
Master of Fine Arts • Brown
Master of Music • Pink
Master of Professional Studies • Peacock Blue
Master of Science • Golden Yellow
Master of Social Work • Citron
Doctor of Arts • White
Doctor of Dental Surgery • Lilac
Doctor of Musical Arts • Pink
Doctor of Medicine • Kelly Green
Doctor of Philosophy • Philosophy Blue

CAPS — In the United States, the black mortarboard is most commonly used. The tassel fastened to the center of the cap is normally worn in the left front quadrant of the cap and is black, although it may be the color appropriate to the discipline of the degree. The tassel for the doctoral cap may be gold.
